

CURRICULUM VITAE OF

Rabius Sani Jabiullah

Address: 107/B, Near Matir Masjid,
Khilgaon, Dhaka, Bangladesh.

Mobile No.: (880) 159-0044148

Email: robiussanijabiullah@gmail.com

Career Objective:

Technical Support Engineer who enjoys identifying tricky bugs and helping clients use products with confidence. With a background in Java and Android development, I am looking to grow my technical expertise and take on new challenges.

Career History: 2 year(s)

1. **IdeaScale**

- Application Technical Support Engineer in the Customer Success Department
- August 2024 – Present
- Responsible for manual functional testing, API validation, technical documentation, and client support to ensure stable performance and effective adoption of the IdeaScale platform.
- Key responsibilities are –
 - Functional Testing & Quality Assurance
 - Perform functional testing of web applications and newly developed features.
 - Validate UI behavior, business logic, and expected system functionality.
 - API Testing & Technical Documentation
 - Design, maintain, and execute structured Postman collections for API testing.
 - Create and maintain internal and external knowledge base documentation.
 - Product Analysis & Client Communication
 - Analyze UX designs and provide usability improvement recommendations.
 - Collaborate with Product, Development, and System Administration teams to investigate issues and maintain product stability.
 - Guide clients on effective system usage, conduct user interviews, and document feedback and requirements.
- Key Contributions: Idea Duplication & Matching Score, IdeaScale AI Chatbot Evaluation
 - **Contribution to Idea Duplication & Matching Score:**
 - Conducted API testing via Postman to verify backend responses and data consistency.
 - Manually validated matching score calculations against expected results.
 - Identified defects, documented reproducible test cases, and collaborated with developers to resolve issues.
 - Deliverables**
 - Comprehensive test scenarios and defect reports.
 - Recommendations for feature improvements and quality enhancements.
 - **Contribution to IdeaScale AI Chatbot Evaluation & Improvement:**
 - Evaluated AI chatbot responses using extensive prompt-based testing.
 - Analyzed the chatbot's reasoning process to identify incomplete and inconsistent responses.
 - Documented prompt failures, edge cases, and response quality issues.
 - Deliverables**
 - Failure analysis reports with improvement recommendations.
 - UX enhancement suggestions for the AI chatbot.

Skills:

Programming Languages: Java, C

Phone Application Development: Native Android

Web Technologies: HTML, CSS

Tools & Platforms: Figma, Postman, YouTrack, GitHub

Database: MySQL

OS: Windows, Ubuntu

Academic Qualification:

Name of the Examination	Group	Passing Year	Board / University	GPA / CGPA
B.Sc Engineering	Computer Science & Engineering	2023	United International University	3.38 (Out of 4)
H.S.C	Science	2017	Dhaka	4.50 (Out of 5)
S.S.C	Science	2015	Dhaka	4.28 (Out of 5)

Achievements & Awards:

Awards:

- **Runners-up, Support Competition 2025** – Recognized for identifying UX-related issues and contributing to product quality improvements across the IdeaScale platform.
- **Champion, UIUCSE Project Showcase 2022** – *System Design and Analysis* project: "**Krishok Bondhu**".
- **Runners-up, UIUCSE Project Showcase 2022** – *Software Engineering* project: "**Shohoj Thikana**".

Participation:

- project fair (Ignition) at **KUET 2026**.

Projects:

- [Shohoj Thikana](#) | Android, Java, Firebase, MySQL, Google Maps
Built a research-informed Android application combining HCI research and privacy-aware design to address real-world location-sharing safety challenges.
 - Designed low- and high-fidelity wireframes and collaborated with faculty, end users, and developers to iteratively refine usability and interaction flows.
 - Integrated Google Maps SDK with interactive map visualization, location markers, multiple map modes (Normal, Hybrid, Satellite, Terrain).
 - Implemented a Material Design interface with animated splash screen for an enhanced user experience.
- [Krishok Bondhu](#) (Grow Now Pay Later) | Android, Java, Firebase, MySQL
Developed a mobile-based AgriTech and FinTech solution that enables farmers to access agricultural inputs through a Grow Now Pay Later (GNPL) financial model.
 - Built secure user authentication and farmer verification using Firebase Authentication and Android file upload APIs to manage NID and land document uploads.
 - Integrated AI-assisted crop risk prediction by combining a Java-based machine learning model with farmer, land, and weather data to support GNPL eligibility decisions.
 - Enabled persistent login and local preferences using Android Shared Preferences.
 - Synced application data to MySQL through RESTful APIs.

Thesis / Research Works:

- Between Control and Safety: Purpose-driven Location Sharing Experiences in Bangladesh**
Investigated how Bangladeshi users balance privacy and safety when using location-sharing applications through mixed-method research.
Published in: Proceedings of the 28th International Conference on Computer and Information Technology (ICCIT 2025), IEEE, Cox's Bazar, Bangladesh.
DOI: [10.1109/ICCIT68739.2025.11490330](https://doi.org/10.1109/ICCIT68739.2025.11490330)

Language Proficiency:

Language	Reading	Writing	Speaking
Bangla	High	High	High
English	Good	Good	Good

Personal Details:

Father's Name	Dr. Md. Ismail Jabiullah
Mother's Name	Saleha Khanum
Date of Birth	21 August 1999
Gender	Male
Marital Status	Unmarried
Nationality	Bangladeshi
Religion	Islam
Permanent Address	107/B, Near Matir Masjid, Khilgaon, Dhaka, 1219
Present Address	107/B, Near Matir Masjid, Khilgaon, Dhaka, 1219
